# Why GUVI

Our approach is radical talent transformation by offering a "best-in-class", yet the affordable form of tailored training. The goal is to bring new initiatives & work patterns that fuel growth & productivity

## Methodology

### 1. Analytics

We identify the strengths and knowledge gaps within your team and help create a unique development plan as per the requirements.

### 1. Transformation

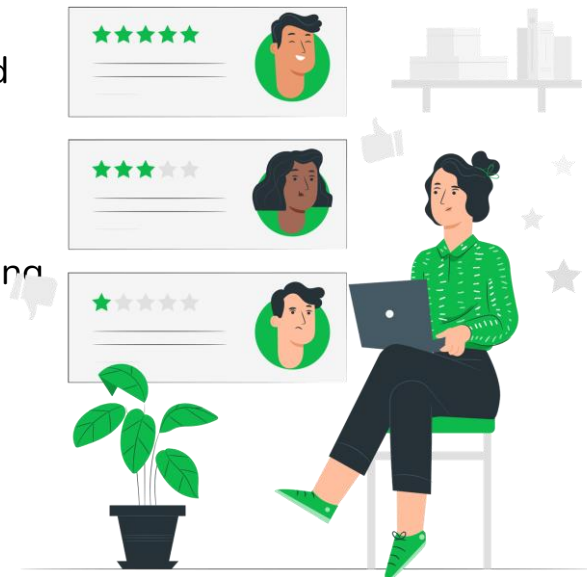

Upskill your in-house resources with top in-demand technologies, led by industry leaders & project-based approaches who know them best. Be it cloud, network security, Full-stack engineering, or Data Analytics.

### 1. Assessment

8+ years of industrial experience helped us come up with a unique employee competency assessment along with skill assessment for all domains.

### 1. Impact

Our proven methodology will help you achieve targeted results that increase productivity and employee retention.

# Technologies we cover

- Full Stack Development (Java, MEAN, MERN etc)
- Data Science / Artificial Intelligence
- Cloud Computing
- Cyber Security
- Software Testing
- Mobile App Development
- Informatica ETL
- Microsoft Technologies

# Training Program

## Pre-Boot Camp:

- We start our training with orientation and giving access to our online platform so each candidate can get used to our platform.
- We also conduct assessment to understand each student's strength and weakness in the particular skillset and design the program accordingly

## Main Boot Camp:

- Our training Sessions will be 2 to 3 hours (Weekdays/ Weekend based on client's convenience)
- Each student can raise the doubt between 9 am to 6 pm through Zen portal. Our mentor will clarify the doubt through email/message/call
- We conduct weekly assessment after finish each topic and the detail report will be shared with client along with their coding practice scores
- We conduct review meeting once in 2 week with client to discuss on the detail report of each candidate

## Post Boot Camp

- We provide you the detailed report of each candidate and share you the ratings.

# Training Medium

- Online training will be conducted through Zoom / ZEN Platform (of GUVI)

## Assessments & Reports

- Pre and Post assessments will be conducted.
- Weekly periodic assessments will be conducted.
- Assessments will be done in GUVI platform and the same will be shared with the ClientsTeam .

At end of the Training program, a comprehensive report will be generated for each student which covers the below

Skill aspects:

- Coding skills
- Debugging skills
- Syntactical efficiency
- Coding efficiency
- Project Performance Rating (via Hackathon)
- Overall readiness in a scale of 1- 10 for each Skillset
